

Contract manufacturing Product & packaging reference

223 historical manufacturing pack entries, plus 122 online product references.

Companion to the KAPPL contract manufacturing and private-label guide. Browse the existing product range and listed pack sizes before sending a manufacturing enquiry.

Edition R01 - issued / W.e.f. 5 October 2026 for this reference only. Historical source: 22 September 2025; online pack snapshot: 28 September 2026. No new commercial effective date or price validity is asserted.

Read before choosing a product

223 historical export/contract manufacturing pack entries, plus 295 online variant references. Historical box quantities and minimum orders require current confirmation. Product licence mapping and physical packaging dimensions remain pending.

Every product-specific manufacturing approval and packaging specification remains Factory confirmation required. Do not promise a pack, a box size, a minimum order or a delivery date from this reference.

The historical section preserves the source box packing quantity and minimum order quantity. These are dated source values, not reconfirmed current terms. Product approvals, physical box dimensions and custom packaging still require factory confirmation.

Browse and download

Search by product name, category, pack size or SKU. Download the editable Excel master or machine-readable CSV/JSON from the same page.

Packaging & box specifications

Pack size describes the contents, such as 200 ml or 60 capsules. It does not tell you the bottle material or the dimensions of a box.

The master includes the following fields for each exact product variant. They are marked as requiring factory confirmation until a source is supplied:

Field	What the factory must confirm
Manufacturing / private label	Whether this exact product may be made for a client brand.
Primary pack	Container type, material, closure and approved fill/count.
Individual box	Length x width x height in millimetres; state if no box is used.
Shipping carton	Units per carton; length x width x height in millimetres.
Carton weight	Gross packed weight in kilograms.
Commercial details	Minimum order quantity (MOQ), lead time and custom-pack limits.
Approval evidence	Source link, verifier and verification date.

Before a quotation

Send the product name, desired pack size, quantity, destination country and whether you need an existing or custom formulation. The team must confirm product fit, packaging, labels, market requirements and commercial terms in writing.

Historical manufacturing range

Source: REF22092025/V3/INR, effective 22 September 2025, printed pages 9-18. The source heading reads "Export and Contact Manufacturing Prices". Prices are omitted here. "Box qty" reproduces the source packing-size count; it is not a physical box dimension. Minimum order quantity (MOQ) retains the source unit, including kg. Confirm current terms and licence linkage before quoting.

Licence copies & product scope

The resource page includes the current e-signed Form 25-D, Schedule T GMP certificate, classical product annexure and ISO 9001 certificate. Read the document-specific dates and scope notes there.

Form 25-D TN/D/046/2026 took effect on 29 May 2026 and was verified by the authority on 10 September 2026. The document says it remains valid perpetually unless suspended or cancelled, subject to its conditions. Old licence number 1250 may be used only until 31 December 2026.

The earlier classical annexure contains 246 serial entries, while the earlier licence referenced codes up to 239. Exact endorsement/code mapping to the current licence remains unconfirmed. An annexure listing is not a promise of present production availability. AYUSH personal-care approvals must not be described as a current Form 32 cosmetics licence.

Physical unit-box and carton dimensions are not supplied by these licence copies. The factory must confirm them for the selected pack.

Online product references

Supplemental range: 122 product references and 295 India/Global variant records from the 28 September 2026 snapshot. These are separate from the historical manufacturing entries and do not establish manufacturing eligibility.

Arishtams & asavams

8 product references. Sizes below are listed source packs; manufacturing and packaging require factory confirmation.
